Unicode fonts and instructions for including Arabic diacritics

Below you will find instructions to permit any PC user to include a wide range of diacritic characters required when transliterating Arabic into English text.

We recommend the Gentium font, which is used by the Encyclopedia of Islam. However, any Unicode font will work. icrosoft Word. You may want to print out these instructions.

If you are not installing the Gentium font, skip Step 1 and go to St /F1 11.04 f1 0 0 1 50.2 55 m () TET EMC /P & MCID 16

In Word go to Insert Symbol More symbols. In the font box select Gentium. Follow the screen shots below to learn how to create short cut keystrokes which allow the rapid insertion of special characters.

Highlight the desired

ut Key.

Custo de la Reyboard		?
Specify≱i command
