

TenureTrack Faculty Position

Open to rank of Assistant Professor

Canada Research Chair Tier 2 Urban Food Production Engineering

Faculty: Agricultural and Environmental Sciences

Department/School: Bioresource Engineering

The Canada Research Chair is also open to internal candidates who already hold a ~~tenure~~ tenured faculty position at McGill University.

Position Description

The Department of Bioresource Engineering at McGill University invites applications for a ~~tenure~~ tenure track position as an Assistant Professor in Urban Food Production Engineering. The successful candidate can address several challenges in urban, local, and northern food production systems. The scope of the position may include, but is not limited to: urban agriculture (e.g., plant factories, roof top greenhouses, container farming and novel food production systems), green structures (e.g., green walls, edible walls, green roofs ornamental displays, medicinal plants, and roof top greenhouses and gardens), smart housing for animals, regenerative building design (e.g., biomimetic and biological processes for water collection, heat island mitigation, waste reduction and nature based systems), climate control for biological and agricultural buildings, sustainable structural design and life cycle assessment. The Department of Bioresource Engineering is part of the Faculty of Agricultural and Environmental Sciences on the Macdonald Campus located 35 km west of Montreal's city center and the downtown Campus. Eligibility conditions for CRCs are on the CRC Program website:

http://www.chairs-chaires.gc.ca/programprogramme/nominationmise_en_candidatureeng.aspx#s2

Job Duties

The suitable individual will teach courses related to agricultural building design, energy management and design, and integration of biology into building design for bioresource engineering students as well as graduate students across multiple disciplines. Emphasis shall be given to urban food and plant production and animal housing but can include related areas such as regenerative building design, structural analysis (statics and dynamics), building foundation design, energy management (HVAC, thermal management, and novel energy systems), building control, renewable energy, data collection/monitoring, and other emerging technologies pertaining to building and controlled plant environments, human wellness, and food quality assessment.

Qualifications and Education Requirements

The successful candidate must have a Ph.D. and a bachelor's degree in engineering and preferably a field associated with building and structural design.

APPLICATION PROCESS

Applications must be submitted through Workday

https://mcgill.wd3.myworkdayjobs.com/McGill_Careers/job/MacdonaldStewartBid/AssistantProfessor_JR0000049033

Related questions can be addressed to Prof. Hamid Akbarzadeh (hamid.akbarzadeh@mcgill.ca), chair of the search committee.

The following supporting documents are required:

- x A cover letter and curriculum vitae
- x A statement of teaching and research interests
- x The names and contact information of three referees. For Tier 2 nominees at the rank of Assistant Professor who are within three years of their PhD, one referee must be the PhD supervisor.

For internal applicants only Supporting documents include a recent curriculum vitae and a statement of research aligned with the designated subject area for the Chair.

COMMITMENT TO EQUITY AND DIVERSITY

McGill University hires on the basis of merit and is strongly committed to equity and diversity within its community. We welcome and encourage applications from racialized persons/visible minorities, women, Indigenous persons, persons with disabilities, ethnic minorities, and persons of minority sexual orientations and gender identities as well as from all qualified candidates with the skills and knowledge to productively engage with diverse communities.

McGill further recognizes and fairly considers the impact of leaves (e.g., family care or bereavement) that may contribute to career interruptions or slowdowns. Candidates are encouraged to signal any leave that affected productivity, may have had an effect on their career path. This information will be considered to ensure the equitable assessment of the candidate's record.

McGill implements an employment equity program and encourages members of designated equity groups to self identify. It further seeks to ensure the equitable treatment and full inclusion of persons with disabilities by striving for the implementation of universal design principles transversally, across all facets of the University community, and through accommodation policies and procedures.
