

STOKE UP FROM THE DEBATE

Dear MIMM,

During financial hardship, it's easy to lose sight of our vision. The routine and variations in the work we do can be challenging, but it's important to remember that we are a research department. Their work certainly has had a very positive impact not only on their lives but also on our department. We wish them the best in their future and we encourage them to keep in touch with us as they move forward.

In the vein of celebration, do not miss the upcoming MIMM

Renewal at 4 levels. While we will be celebrating this, it is going to be our 5th goal. So, get ready for a very special celebration that the Organizing Committee is putting together. If you missed saying the Greeting, please contact Land at the Office. There may be some details to follow.

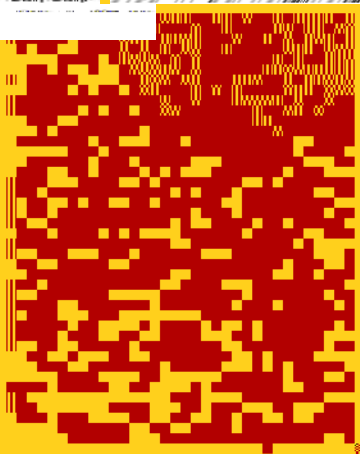

We have a lot to be proud of as we celebrate our 5th goal. We are so proud of you and the MIMM Undergraduate Research Day and MIMM Graduate Research Day, respectively. See further details below.

regarding the paragraph I wrote for last month's MIMM Bites. All of them agreed that we need renewal at CiHR. If you are interested in participating, please contact Land at the Office.

Enjoy Spring 2016!

Yours in service,

Quim
